

Jordan Alvarez

Software Engineer · jordan.alvarez@email.com · (555) 012-3456 · Portland, OR

Professional Summary

Detailed-oriented software engineer with 5 years of experience building scalable web applications for both startups and enterprise clients. Skilled in Python, JavaScript, and cloud infrastructure, with a particular focus on backend systems and API design. Passionate about writing clean, maintainable code and mentoring junior developers.

Work Experience

Senior Developer — BrightPath Technologies, Portland OR (2022–Present)

- Led the development of a microservices architecture that reduced average API latency by 40%
- Mentored junior engineers through weekly code reviews and pair-programming sessions
- Collaborated closely with product managers to prioritize the engineering roadmap each quarter
- Owned the migration of legacy services to a containerized deployment pipeline

Software Engineer — Vantage Digital, Seattle WA (2019–2022)

- Built and maintained customer-facing dashboards using React and Django
- Improved test coverage from 45% to 85% across the core codebase
- Participated in on-call rotation, resolving production incidents within SLA

Education

B.S. in Computer Science, State University (2019) — Graduated with honors
